

**PROGETTO AVATAR**  
**IPSSAR P. BORSELLINO Palermo**  
**Venezia**  
**settembre 2015**

# ***The Training Course***

*I will begin from the end...*

# When the project finished....

*I wondered if ...*

*it had taught more*

*to the students*

*or to the teachers....*

**AVATAR** showed us  
how to become **different** from the past ...  
**more aware** for the future ...

***Or ...  
were we ready for the future so we began Avatar?***

# ***My AVATAR Course***

Last October, when I began my training course, I was not sure I would complete it.

Sometimes I thought I wouldn't be able to carry out the tasks (especially module 7!).

Sometimes I thought the tasks were interesting but too difficult...

They were so far from my starting skills...

I faced some activities *bravely* but now

I am absolutely happy I went through with them!

# ***Teamwork***

# During the Project

some tasks caused me  
**unexpected problems**

some tasks were **easier**  
and **more successful** than  
I thought (*my students  
were good and the  
activities suited them*)

**My students are**

good at / keen on

**Information Technologies**

...

*Let us learn from each other!*

# ***A Brief Summary***

# At the beginning ...

In April my students  
entered SL with some  
difficulties:

**our firewall  
didn't allow us  
any access !**

# then...

One of my students  
*(a boy who is not usually very  
interested in literature or  
history)*

was better than the  
computer operator and  
me:

**he found the way!**

# Finally

The students  
**logged in**  
and **chose their**  
**AVATAR**

They also changed it  
many times !!!

**Here is one of their Avatar: a monster...**

**The students pretended  
to be working in an office...**

**and to be travelling...**

**We explored a lot of interesting locations:  
virtual museum of paintings...**

**... virtual Natural History Museum...**

# Let's move to a fantastic past!

## ***Other Steps***

When my students couldn't teleport in the Avatar Region, I told Maja.

She asked our expert: Andrew.  
He changed the Region in General and so our problems were solved.

**Finally the students could enter the Avatar Region.**

# Learning New Skills

# Students were able to

- build geometric figures;
- change textures;
- place their Avatar on the swimming pool.

# Students

had

a nice time

all together

# Students were happy to be in the Avatar Region

# One student built cars...

**I didn't know how it was possible...I didn't teach him... His friends were happy to be there.**

# **Improving our Skills**

**Two fiancés built a little house  
and chose some furniture from the inventory.**

**A shy girl built a lot of different buildings and another one flew on them. I walked up and down this space ...**

# I made great progress in building in the sandbox

# We built planets too!

**One of the students turned into  
a transparent object...**

**me too...**

**Above all students  
enjoyed their lesson!**

# Principal Aims

Students

- **enjoyed** the project
- **felt at home** during activities
- **reinforced** their motivation
- **implemented** their training program

*(...as I wrote in my project...)*

# Our Motivating Spark

- My students worked in a **motivating context**: they were **free to create** and they could improve their **problem solving skills**.
- Our **motivating spark** is :

***EDUCATION IS AN OPEN SPACE***

***WHERE***

***OPEN-MINDED PEOPLE GROW UP!***

*My students are flying: that's enough for me.*

# Let them fly!

# ***Final Steps***

- In June, a lot of students and I (me too!) could have **script** and **moving objects** in the Avatar Region.
- My students wrote about the project in a **class test**.

## Fabrizio said:

“SL ti permette di realizzare ogni desiderio che per motivi personali non si è mai potuto raggiungere nella vita reale”.

**... you can  
see your own  
dreams come  
true....**

**Jenny said:**

“In Avatar, Second Life è usato per obiettivi educativi e formativi, di apprendimento e sperimentazione e per completare e approfondire la conoscenza delle lingue straniere”.

**... you can  
learn  
and improve  
foreign  
languages ...**

**Elisabeth said:**

“Avatar si differenzia  
dai videogiochi perché  
non ha la funzione di  
avanzare di livello”.

**...it is  
different  
from video  
games ...**

Giorgia said:

“... è un progetto che mette a confronto un mondo virtuale con la realtà”.

**...you can  
compare  
real life  
and virtual  
world....**

# STRENGTHS

- Teachers and students learn together so their roles are different but **interchangeable**.
- AVATAR becomes a **bridge** between teachers and students.
- The project becomes a bridge towards the **future**.

# WEAKNESSES & DOUBTS

- Some **modules** should be easier for teachers (we are not technicians!) .
- **Learning times** and **deadlines** need to be revised .
- When students were well aware of the activities...they had to stop.
- If there is no future for the Avatar project, **will we lose our skills?**

Thank you Avatar.  
Bye-Bye
